PROFILE SUMMARY

PHP Developer with 2 years of hands-on experience building e-commerce platforms, informative websites, and booking systems using custom MVC architecture, Core PHP, and WordPress. Skilled in developing admin panels, integrating payment gateways and logistics APIs including Bigship and Shiprocket, and delivering complete websites from database design to deployment. Experienced in working independently on live client projects and collaborating with stakeholders to translate business requirements into functional web applications. Currently strengthening frontend development skills with React.js and expanding backend expertise in Laravel.

EXPERIENCE

OnliveServer.com

July 2024 – Present

PHP Developer

India

- Developed and maintained custom MVC-based e-commerce websites including **Dadolf.com**, **SastaSaaman.com**, and **Svastra.com**, covering product catalogs, cart systems, checkout workflows, and admin panel modules.
- Integrated payment gateways to support secure online transactions and implemented **Bigship** and **Shiprocket** APIs for shipping, order tracking, and logistics management.
- Built and managed informative websites including **IndiaMedicalTrip.com**, **StudyMyntra.com**, and **PPIndiaExports.com** with structured content, SEO-friendly layouts, and backend content management systems.
- Developed booking-based websites including **AngelExpress.in**, **DivaTravelWorld.com**, and **24x7Bike4u.co.in** with booking forms, admin-side request management, and status tracking workflows.
- Worked on WordPress plugin development and customization, along with application modules developed using the CodeIgniter framework.
- Designed, maintained, and optimized MySQL databases and queries across multiple live production projects.
- Collaborated directly with clients and stakeholders to understand requirements and deliver functional, production-ready web applications.

KEY PROJECTS

Dadolf.com — SastaSaaman.com — Svastra.com

E-commerce Websites – Custom MVC

- Developed complete e-commerce platforms with product management, shopping cart, checkout, admin panel, payment gateway integration, and order management functionality.
